

Inspection, Testing and Certification of Electrical Installations

City & Guilds 2391-10

Course Details

The following areas are covered:

- 1 Inspection and Testing requirements of the I.E.E. Regulations.
- 2 Certification and Reporting Procedures.
- 3 Use of Instruments.
- 4 Practical Assessment of Electrical Installations.

This course has been developed in association with the National Inspection Council for Electrical Contracting (NICEIC) and will satisfy the NICEIC's particular requirements that prospective qualifying managers (QMs) and operatives are fully conversant with the requirements of BS 7671 (IEE Regulations) for Inspection, Testing and Certification of Electrical Installations.

A Course for

Practising electricians who wish to be accredited to meet the new requirements of the electrical industry.

Entry Requirements

Students **must** have successfully completed the IEE Wiring Regulations - 16th Edition (BS 7671:2008). This qualification is for qualified electricians who actively engage in inspection and testing. Candidates new to the industry will need to take the initial verification qualification.

Learning Outcome

On successful completion, the student will be able to safely and accurately test electrical installations.
